Higher Education Intrusion Detection
As vital as your education outcomes

Rising unrest and volatility in society, combined with more targeted school attacks, makes a world-class intrusion detection system as vital to your institution’s health and reputation as your quality of education.

Preventing just one incident more than covers the cost of a quality system multiple times over. Just consider the risks otherwise: soaring litigation and insurance costs, as well as loss of student/parent trust.

Rely on Johnson Controls: our specialists are experienced at protecting universities and colleges with smart systems that keep watch 24/7/365. We partner with you to develop the system that will fit your specific campus challenges, including leading-edge perimeter protection and intrusion detection sensors, systems and services. We handle it all: initial layout, installation, testing, inspection, monitoring and continued support.

Johnson Controls intrusion detection solutions safeguard some of the highest-security facilities in the nation, plus thousands more organizations. Insist on that same elite protection for your educational institution.

Build a targeted solution that fits each individual facility:

- Integrate your intrusion detection with video surveillance
- Remote management including remote arm/disarm, and alert notification
- Protect faculty and staff with hold-up and panic buttons
- Control security from anywhere with Mobile Security Management
- Car barriers, k-rated gates, card access and more deny unauthorized access
- A full spectrum of monitoring and reporting tools to oversee facility access

Johnson Controls has extensive experience protecting campuses of all sizes:

- Large, multi-campus state university systems
- Single-location private colleges, universities and vocational schools
